Tolu A. (Grade 11)

PROGRAMME  
SAT Programme

TEST DAY  
SAT, 5 Dec

TUTOR  
Gabriel

IS TOLU ON TRACK?

On track for 1300 by 5 Dec

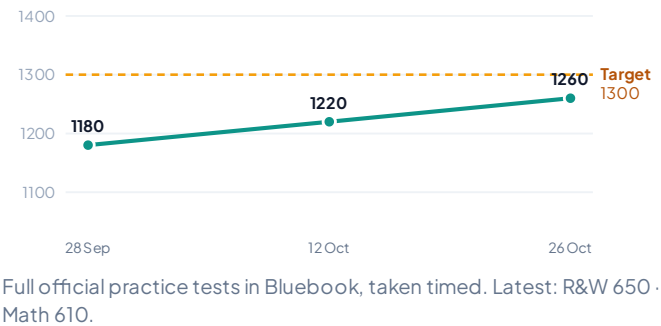

Started at 1180 on 28 Sep, now 1260: up 80 in 4 weeks (+20 a week). To reach 1300 in the 5 weeks left needs about +8 a week.

CLASSES  
7/8

HOMEWORK

What changed

|                                                          |              |
|----------------------------------------------------------|--------------|
| Boundaries<br>2/7 right → 6/7 right                      | Gap → Strong |
| Equivalent expressions<br>1/4 right → 3/4 right          | Gap → Shaky  |
| Nonlinear equations and systems<br>2/5 right → 3/5 right | Gap → Shaky  |
| Nonlinear functions<br>2/5 right → 3/5 right             | Gap → Shaky  |

What we did this month

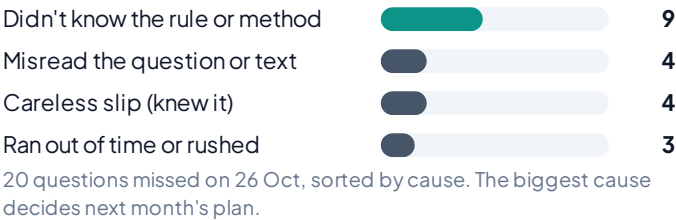

- Joining sentences: the four punctuation rules, then timed sets (now 6 of 7 right).
- Exponential and quadratic functions: reading them from equations, graphs and tables.
- Rewriting expressions without losing signs.

The skill map all 30 tested skills

Each square is one skill; outlined squares changed band this month. It is the same map as the first score review, so you can watch it fill in.

Where points went on the last test

Next month

- Quadratics: vertex form, factoring, and when Desmos is faster.
- Right-triangle trigonometry and circles (still gaps: 0 of 3 last test).
- Two more full practice tests: Saturday 14 and 28 November.

Your part this month

Keep Saturday 14 and 28 November, 9:00 to 11:30, free for full practice tests at home: phone in another room, one sitting, no pausing. That's all we need from you this month.

A strong month. The punctuation work paid off within two weeks, and the Math gaps have become 'shaky', which is the step before points. Most points now go on methods not yet learned rather than on carelessness, so next month I'll teach the missing methods first and add timed practice once they hold.
